# General Specifications

# AdvancedUserConnect

OKOGAWA

## Overview

The program AdvancedUserConnect performs automatic User Management Synchronization for the Yokogawa SmartDAC Recorder family. For an effective User Management it is possible to activate the times of the function at different intervals.

Save the implemented User settings and Group settings for a disaster recovery procedure.

## Specification

(1) Connection between the "Master" Recorder and the PC Software

- Receive User settings from MASTER Recorder
- Send back the information to the MASTER

Recorder

- User can change password on the MASTER Recorder

(2) Software AdvancedUserConnect

- Receive User settings from Recorder

- Editing User settings on the Recorder

- Transfer User inclusive Settings to each other active Recorder

(3) Connection to the "CLIENT" Recorder

- Receive user settings from MASTER Recorder
- Receive user settings from CLIENT Recorder

- Synchronize the User Settings between the MASTER and CLIENT Recorder

# Connection Devices

The following table lists the devices that AdvancedUserConnect can connect to. Data can be collected by registering devices to the Software and connecting via communication interfaces.

Model	Release Number	Interface Ethernet
GM10	R2.02 or	Yes
	later	
GX10	R2.02 or	Yes
	later	
GX20	R2.02 or	Yes
	later	
GP10	R2.02 or	Yes
	later	
GP20	R2.02 or	Yes
	later	

Model	Optional Code	Supported
GX10 / GX20		Yes
GM10		
GX10 / GX20	/AS Advanced	Yes
GM10	Security Function	
	-	

## Configuration

Configure the Plant and add the Recorder to the plant.

• One Plant is default incl. and unlimited recorder in one Plant.

• Only one Recorder can define as Master Recorder per Plant.

The Software can work together / parallel with other monitoring software solutions, like GA10 or MCPS (<u>www.MCPS.de</u>)

## Export / Import

You can export/import a plant. Also a Recorder configuration file (\*.GNL) can be import.

## **Online / Offline**

You can use the software in online or in offline mode.

• Online: Read the User and Group settings from the Recorder, change the settings and write the settings back to the Recorder

• Offline: Configure the User and Group settings offline and send it later to the Recorder.

# Optional Functions

## Multi Plant (/MP)

With the Multi Plant option it is possible to defined more than one Master Recorder to implement different Plants. Use Recorder at the Sterilisation Area and the Production Area with different User Settings.

# Audit Trail (/AT)

If a Recorder use with the Option /AS, it is possible to use the Audit Trail Option of the software. Within this software option, it will be log every User Changes and also every System Change at the Software and at the Recorder.

The Software support Login with Username, User ID and User Password.

There are three Administrator Accounts implemented. It is also possible to use an "Admin" Account of a Master Recorder.

# PC System Requirements

#### Hardware

Item	Description
CPU	Pentium 4, 3.2 GHz or
	faster
Main memory	2 GB or more
Hard Disk	40 MB or more of free
	space
Mouse	Mouse compatible with OS
Display	1024 x 768 dots or higher,
	65536 colors or more
Communication	Ethernet port compatible
Ports	with the OS.

## **Operating system** 1

OS	Edition	32bit	64bit
Windows 7	Professional	Yes	Yes
Windows 10	Pro	Yes	Yes
Windows	Standard Yes		
Server 2012			
Windows	Standard	Yes	Yes
Server 2012			
R2			
Windows	Standard	Yes	Yes
Server 2016			

1 Make sure to use the same language setting for this software, Windows OS, and the recorders that data is to be collected from. 2 Exclude operating systems that Microsoft has finished supporting from "PC System Requirements."

Windows .Net Framework

- Version 2 Full installation
- Version 4 Full installation

#### **Firewall Settings**

The Software uses the Port TCP 34434 as default for the Communication to the SmartDac device. For the Web Interface the Port 80 is in use. Within the Setup routine the Software will be apply into the Windows Firewall.

# Model and Suffix Codes
